摘要: 本文记述了产自我国云南省的版纳蛛属 1 新种, 宋晓彬版纳蛛 *Bannana songxiaobini* Tong & Li, sp. nov., 并提供了详细的形态描述及特征图。新种的模式标本采集于山大齿猛蚁 *Odontomachus monticola* Emery, 1892 的巢穴内。该种类是我国首次发现的卵形蛛科的蚁客蜘蛛。

关键词: 卵形蛛; 蚁客; 新种; 分类。

Clubiona theoblicki, a name to replace *Clubiona quadrata* (Araneae, Clubionidae)

YU Hao¹ & LI Shu-Qiang^{2*}

Clubiona theoblicki nom. nov.

= *Clubiona quadrata* Yu & Li, 2019: 161, f. 7A-E, 8A-H. (Primary homonym of *Clubiona quadrata* Kraus, 1955, now in *Elaver*)

Etymology. The species is named after Theo Blick, one of the editors of World Spider Catalog, which has improved spider taxonomy worldwide; noun (name) in genitive case.

Diagnosis and Description. see Yu & Li, 2019.

Yu & Li (2019) established a new species of the genus *Clubiona* Latreille, 1804 based on specimens from Xishuangbanna, Yunnan, China, i.e. *Clubiona quadrata* Yu & Li, 2019, whose name is considered invalid as it has been previously used for a species from El Salvador, i.e., *Clubiona quadrata* Kraus, 1955 (now in *Elaver* O. Pickard-Cambridge, 1898). Consequently, a new species name, *Clubiona theoblicki* nom. nov. is proposed for the spider taxon from Xishuangbanna, China.
